Depict Years, failure, waiting - Our only education is in fact the process called creative and experimental Mao and even Only Lazarus in fact with Cornel West and Sirohi, we call that our education – we also mean everything here is meant to be spoken in that antagonism – that type of learning – I also mean it is agitation in Lenin and that waiting Trotsky – it is just that agitation we call walking up and down and talking to the bit bill. I call it strong avant-garde literary communism – the Women's point is always like them. I mean they are mine.

The rest is your debate – I call it tuning earlier – now System – you get that – like practical elements and contours to learn that Cubism we called our past – which is now too in fact lyrical about personal lives, success and libraries. I call this a library act – It means in Sirohi learning from Brecht in fact – his meaning of a library with microphones and radios and that is simply in his more avant-garde style a talking agitational radio.

Introduction – Written by Peter Weiss

In fact the German work Aesthetics of Resistance is now published in full three volumes by Sirohi, in true format of picking up its language exercise – this then shifts to its framing together for me.

I want this to be an exercise – you get that. I want the Communist dictat on health, it is such processes which we remember.

Communism is that angst, that crying. All through our lives. This then means Trotsky not Stalin or Hegel.

We will bury you, your grandchildren will be Communist – I say to those who kill us.

I. 1907 – 1919

Insurrection, a process.

II. 1919 – 1921

Failure, complete tragedy.

In fact, don't think they are absolute, this even reflects on the Soviet Union years and their visits and failure and tragic inspirational images. Imagine myself Ilaan, failing, I cannot live, this

captures all revolutionaries, but especially Trotsky and Lenin. Why can’t we live without the revolution liberals might agree, that it is too dogmatic, but no, it moves us to think about the revolution and all its ethics, as our Judaism. What will Judaism say about Israel, what about those letters of Rosa Luxembourg to a comrade, Karl who means Sirohi, what about that sublime crying.

III. 1950 – 1990

Failure again. I cannot live, Fidel is sent to hospital after he simply gives up.

IV. 2020 – 24

Absolute. Inspirational! Now we perfect the system – women are completely in love. I declare a System – of Sirohi, fuck Hegel.

I. Points, points in minute detail, complex patterns of points.
II. All shot in one detail, in some History of the Other face we are by anti-communists.
III. Such points, as a Luckacs with his pen.
IV. Fuck off black power is with the same practical humanism.

I call this a system.
